

Functional Roll Gauges for Tapered Threads

The MRP-5000 series of thread pitch diameter gauges use hardened and ground thread rolls to inspect functional size of tapered threaded connectors. The MRP-5000 gauges are adjustable within a size range and have interchangeable thread rolls for inspection of all API thread forms. The gauges must be preset to size using one of a variety of setting methods available. *Please specify preferred taper arms when ordering. Thread rolls are sold separately.*
