

Multiplexers

A wide range of flexible **Sylvac Multiplexers** are available to enable the connection of multiple transducer probes (up to 64) or instruments containing an Opto RS232 output to the Sylvac range of digital display units. Plus other types of digital instruments.

MULTIPLEXERS

Code No	Description	Price (£)
30-904-1104	D104 4 channel opto multiplexer for use with D232, D100S, D104 PC	£506.00 I
30-904-1105	D104PC 4 channel opto multiplexer for use with direct connection to PC or D100S	£588.00 I
30-904-1102	D102 2 channel multiplexers for use with D80S + D100S	£486.00 I
30-904-1108	D108 8 channel multiplexers for use with D80S + D100S	£609.00 I
30-904-1110	D110 Pneumatic control unit for use with D80S + D100S	£751.00 I
30-904-1111	D111 Additional pneumatic control unit for use with D110	£630.00 I
30-904-1112	D110VPneumatic control unit for use with D80S, D100S for use with vacuum probes	£607.00 I
30-904-1113	D111VAdditional pneumatic control unit for use with D110 for use with vacuum probes	£381.00 I
30-925-1151	Power Booster for continuous power supply for D104PC and Power Opto Cable	£96.00 I

SYLMUX

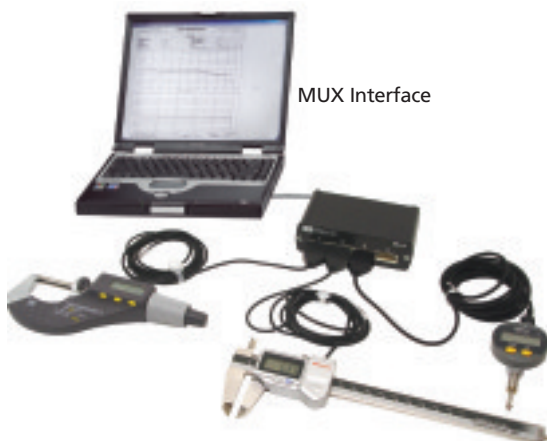

Features

- Possibility of connecting instruments of different manufacture
- Large choice of DIGIMATIC cables available upon request
- Models with 2, 4 or 8 inputs
- Compatible with the DIGIMATIC system
- Automatic recognition of the instrument
- Simultaneous data request of all channels
- Programmable by PC
- Function programming of the cables
- Automatic instrument detection mode
- Selection of individual channel

SYLMUX

Code No	Type	No. of inputs	Readout	Price (£)
30-926-8002	Sylmux 2	2	RS232	£338.00 I
30-926-8004	Sylmux 4	3	RS232	£488.00 I
30-926-8008	Sylmux 8	4	RS232	£660.00 I
